5. MEASURING PROCEDURE

- ∞ Power-up: Press the POWER key to turn the meter on.
- ∞ Selecting the LUX scale: Set the Function switch to desired LUX range.
- ∞ Face the photo detector to light source in a horizontal position.
- ∞ Read the illuminance value from the LCD display.
- ∞ Data-Hold mode: Press the HOLD key to select Hold mode. When HOLD mode is selected, the illuminance meter stops all further measurements. Press the HOLD key again to cancel HOLD mode. Then it resumes normal operation.
- ∞ When the measurement is completed, turn the power off.

NOTE: If display indicates one or more leading zeros, user has to shift the Function switch to the next lower range scale to improve resolution and accuracy.

6. MAINTENANCE

6-1 General maintenance

- ∞ To keep the instrument clean, wipe the case with a dry cloth and detergent, do not use abrasives or solvents.
- ∞ The white plastic disc on the top of the detector should be cleaned with a damp cloth when necessary.
- ∞ Any adjustment maintenance and repair shall be by a qualified person.

6-2 Battery Replacement

- ∞ When the battery voltage drop below proper operation range the  symbol will appear on the LCD display and the battery need to be replaced..
- ∞ Slide the battery cover away from the instrument and remove the battery.
- ∞ Replace with 9V battery and reinstall the cover
